

Aviva Irl Protected Growth Fund

This new fund is suitable for those who are concerned about high levels of risk in the market, but still want the potential for higher returns rather than leaving money on deposit.

The fund aims to provide investors with the medium-to-long-term growth potential of a diversified portfolio of commodities, large Eurozone companies and corporate bonds – while controlling the risk of their capital.

Reasons to Invest:

The Protected Price Promise: Investors have the peace of mind of knowing that their investment benefits from Aviva's 'Protected Price Promise' which aims to ensure that the unit price will not fall below 80% of the highest ever unit price achieved by the fund.

Diversification: The fund invests in 4 asset classes – commodities, large Eurozone companies, corporate bonds and cash.

Growth Potential: The returns on the cash element will depend upon prevailing interest rates – but each of the other investment sectors has the potential to achieve strong growth over time.

Flexibility: Investors can switch into and out of the fund at any time. The fund can also be used as part of a diversified portfolio.
